84.%

Projects

Django Based Ecommerce Website

Developed a Django-based e-commerce site for furniture sales, utilizing HTML/CSS/Bootstrap for frontend and Django/Python for backend. Included features such as user authentication, product catalog with "Add to Cart," and an integrated payment gateway.

Banking System Database

The Database was created on MariaDB Software using SQL Queries and was designed to function as a backend storage database .

Fitness Center(Html,css,js)

Developed a Fitness Center website using HTML, CSS, JavaScript, and Bootstrap. Implemented user-friendly design and interactive features including class schedules and membership forms to enhance user experience.
